

Tobias Danzer

„The development of the future is in our hands“.

Tobias Danzer, CEO of the robotics agency NOX Robots, speaker and future visionary, has been known for his exciting lectures on various future-oriented topics. In his seminars, he conveys impressively how the behavioral pattern of people will change in the future through digitization, smart world and artificial intelligence. Through unusual methods and his inspiring seminar, he creates the audience's attention in seconds and retains concentration until the end of the seminar. During his lectures, he tries to pass on his professional passion and personal visions to his fellow human beings in order to open their horizons and to convey to them the immense effects of our present behavior with regard to the future. He also lectures as a lecturer at universities and technical colleges, while he is very calm and motivating to inform the students about the importance of digitization.

Lecture languages

 German,  Englisch

info@noxrobots.com

Lecture topics

Humanity in the Smart World

- The development of industry 1.0 to industry 4.0
- Impacts of digitization and psychology
- How do I prepare for digitization?

Robotics and Artificial Intelligence

- Automation robots and humanoid robots
- Development of humanoid robotics in the 21st century
- Artificial intelligence in humanoid robots

Bitcoin and Blockchain technology

- What are the differences between bitcoins and the normal currency and what does it mean for me?
- What is blockchain and how is it changing our world in the next 10 years?
